The Mansion Riviera Nayarit

Hycrete Provides Superior Waterproofing Protection for a private mansion in Mexico

Integral Admixtures Deliver Lasting Concrete Protection and Reduce Long-term Maintenance Requirements

Structure: Single Family Mansion	
Applications: foundation walls, structural slab, pool, and koi pond	
Owner: Frederic Deblois	Architect: De Anda Arquitectura
Architect: Nishkian Menninger	Engineer: Cesar Garcia
General Contractor: Casa Alman	Ready Mix Provider: Concretos Miracles

Introduction

The luxurious 22,000 SF waterfront mansion consists of nine bedrooms, nine bathrooms, billiard room, gym, massage room, office and an underground parking garage. The property includes an expansive pool with dive tank overlooking a lake as well as a custom koi pond at the front entrance.

Challenge

In order to accommodate up to 20 guests, a large below grade parking garage had to be constructed below the water table with high hydrostatic pressure. The pool includes a deep dive well, which is also below the water table. Dewatering pumps were required to run around the clock to pour the concrete for the foundation.

Hycrete[®]

Solution

Hycrete Endure WP provided the highest level of performance over the standard waterproofing systems. Using Hycrete Endure WP, the owner was able to accelerate the construction schedule and reduce waterproofing costs by eliminating the need for a membrane system.

Result

The owner was able to shave weeks off the construction schedule, saving them time and money. Hycrete Endure WP provided a non-absorbent concrete surface with reduced maintenance over the duration of the building life span.
